

VACUUBRAND® MD1C

The essential oil-free, corrosion-resistant vacuum pump

These high performance VACUUBRAND® chemistry-design diaphragm pumps provide dry vacuum levels of 2 mbar, making them an excellent choice for most lab applications,

including rotary evaporation of high boiling-point solvents. Their small footprint, low maintenance needs and quiet, reliable operation make them a “good neighbor” in any lab.

Whisper quiet

VACUUBRAND® pumps are extremely quiet. When operating near ultimate vacuum, the MD1C operates at about the same sound pressure level as a hushed conversation.

Extremely low maintenance

Totally dry, there's no oil to change or monitor! Typical diaphragm lifetimes are in excess of 15,000 hours of use—that's years in most applications, so there is very little downtime and low service costs. When it is finally time for service, precision diaphragms eliminate tedious, trial-and-error stroke length recalibration.

Vacuum Pump
2mbar, 0.82cfm

Corrosion resistance

The MD1C is made with chemically resistant fluoropolymer heads, diaphragms, and valves. Cold traps are not required for most applications – great for convenience and economy!

Small footprint

At only about 5" x 10", the MD1C fits easily on benchtops or under hoods.

Continuous condensate purge

The MD1C protects pump performance with an integrated gas ballast that permits continuous purging of condensed vapor from the pump without a noisy, intermittent purge valve.
